HTC Snap

We think a mobile phone should be freeing. It should simplify your life while keeping you connected to the people you care about. We designed the HTC Snap to do just that. Connect. Simplify. And look good in the process.

Life seems to be speeding up. And with more to organize and less time to do it, your phone should help prioritize the people who matter most to you. HTC Inner Circle keeps you connected to your exclusive few. With the touch of a button, e-mails from your "inner circle" rise to the top for quick access and streamlined communication.

The HTC Snap offers a simple set of features, designed to keep your life running smoothly. Update your calendar, manage your contacts and emails and stay totally organized with the familiar experience of Windows Mobile. Even texting is faster than ever with the friendly QWERTY keyboard.

With its slim profile, the HTC Snap boasts an effortless elegance you'll be proud to display, no matter where your schedule has you running.
