

## Mobile Solutions

- Choice of Networks
- Tariff Flexibility
- Integrated with your voice platform

Mobile working is one of the fastest growing areas of business expenditure today, with customers facing a confusing array of tariff options and networks when deciding on the right mobile call plan for their business. By choosing to move your mobile contract to Commsworld we can offer you maximum flexibility and what's more we can save our customers on average up to 40%.

Mobile working is just another extension of your communications network and therefore you should be able to work seamlessly on the move as if you were in the office. With our extensive choice of mobiles you can have email on the move with the right technology, fully integrated with your communications infrastructure.

### Choice of Networks

Commsworld partner with leading networks, Vodafone and O2.

We have wholesale partnerships which enables Commsworld to give you the best possible prices available with the added confidence of being on a reliable network with great coverage.

What's more is that Commsworld bill you directly through our billing platform meaning we can provide bespoke tailored packages specifically to cater for your business needs giving you more control of your mobile spend.

### Flexible Tariff and Model Options

We have a full range of mobile phone choices and tariff options to suit your needs:

- Android, ios, Blackberry, Windows
- Full range of handsets / tablets
- Voice tariffs
- Converged voice and data tariffs
- Bespoke Commsworld tariffs
- Data only connections
- Sim only connections
- International bundles
- 3G availability

### Key Benefits

With our wealth of experience and knowledge you can rest easy while we take the stress out of your communications:

- Our Account Management approach allows us to manage the whole process - no need for you to deal with the network call centres
- Quarterly reviews to ensure you are always on the best tariff
- Online billing with fully itemised reports
- One point of contact through our Network Operations Centre 24/7/365
