

Network Services

- Save Money
- Reduce Costs
- Enhanced Service

Enjoy the benefits of cost savings and consolidation that we can offer by moving existing services for voice, data and mobiles onto one single account through our dedicated billing platform. Commsworld have developed our own high-speed business only network serving Glasgow, Edinburgh and Aberdeen providing extremely fast and reliable voice and data services.

We also partner with the market leading carriers in Scotland and as such can provide you expert impartial advice on what services are best for your business now and in the future. We use the same infrastructure as the major network providers but as we have lower overheads, we are able to offer a cheaper, customer-focused and more convenient service. All our customers have an account manager based in Scotland - local support with one point of contact.

Free No Obligation Audit

Commsworld offers a free no obligation telecoms audit which enables you to establish your current telecom spend on:

- Line rental
- Call charges
- Mobiles
- Broadband
- Data circuits

Significant Cost Savings

We find that after our customers have a telecoms audit not only can we reduce your costs and pin point excessive charges, but you will be able to manage your communications infrastructure more efficiently by consolidating your services under one supplier, thus leaving you more time to focus on your core business activities.

- 98% of our customers have made significant cost savings – saving on average 20%

What are the benefits?

Commsworld provide expert impartial advice and a comprehensive billing analysis, enabling you to gain a clear understanding of your current costs and take advantage of better business solutions now and in the future:

- Reduce costs
- Detailed billing reports with management information
- Clear, simple and easy to understand bills
- One service desk with one SLA
- More bandwidth – half your costs
