

Your business better connected

- Unified Communications
- Converged Networks
- Cloud Services

Commsworld is Scotland's leading Unified Communications Specialist with headquarters in Edinburgh and offices in Glasgow and Aberdeen, providing servicing and support throughout the world. We deliver unified communications, integrating real-time services including telephony, video conferencing, data sharing, instant messaging and presence information with non real-time services, such as voicemail, email and SMS, and offer Cloud solutions for optimum performance.

Commsworld has a diverse customer base, ranging from SMEs and charities through to public sector and FTSE 250 organisations in sectors such as retail, law, oil and gas and leisure. Clients include Historic Scotland, Glenmorangie, Kwik Fit, Peel Ports and Subsea 7.

Unified Communications

Unified Communications fully integrates all your core services reducing the need for complex infrastructures whilst reducing costs.

Components include:

- Instant Messaging and Presence
- Video and Voice
- Document Sharing
- Collaborative Working
- BYOD
- Business Phones

Converged Networks

Commsworld have an impressive pedigree in the supply, delivery and support of network infrastructures and can advise on what solutions and options that will best suit your business needs. Once you have the correct converged network in place you can start to deploy and benefit from the use of Unified Communications.

- LAN
- WAN
- Wi-Fi
- Mobile
